Languages

French: C2
English: C1
Spanish: C2
Hebrew: B1

Skills

- Machine Learning
Supervised, Unsupervised
- Clustering & Anomaly Detection
- Deep Learning
CNN, OpenCV
- Data Engineering
SQL, PySpark
- APIs & Cloud
REST, AWS
- Development
Python, Java, React

Profile

Machine Learning Engineer, I design end-to-end data solutions, from data collection to model optimization. With 7 years of experience in software projects and a specialization in Data Science, I have developed strong expertise in data processing and predictive modeling. I am now looking to grow as a Machine Learning Engineer, working across the full lifecycle of models. Particularly interested in predictive systems, I am especially drawn to the betting industry.
